

SNORLAX

Online Restaurant Aggregator and Food Order System

March 02, 2017

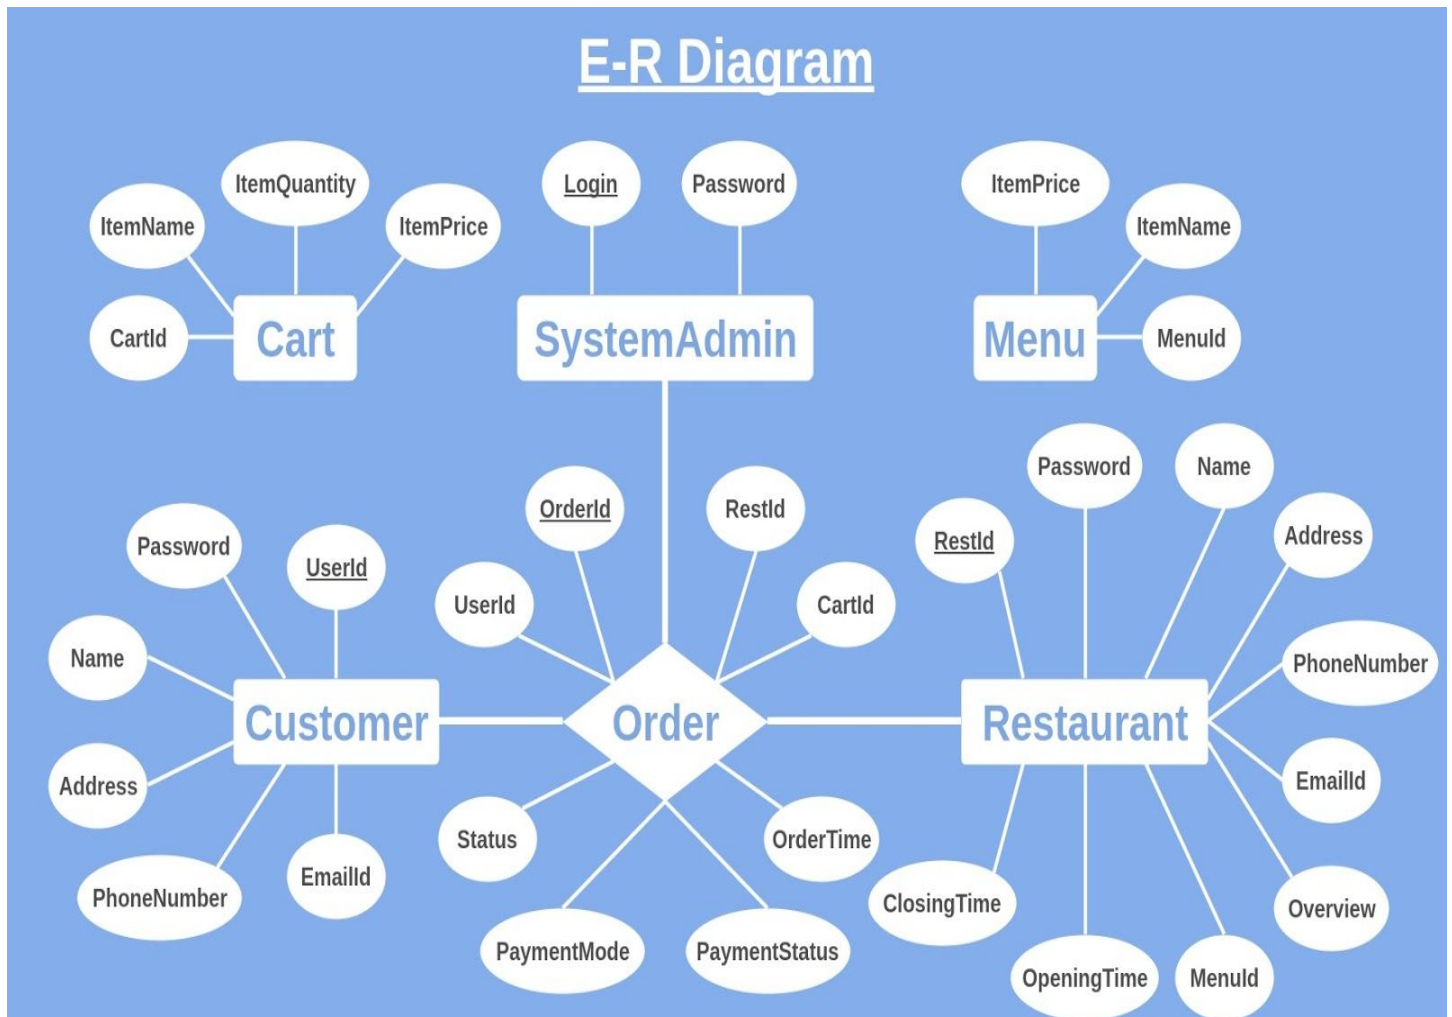

Overview

A web based application for online browsing and search of menu aggregated from multiple restaurants. The system provides restaurant/customer registration module. Allows customers to place orders and track their orders through different stages of delivery. The system also tracks user history and suggests favorites.

Home Page - Restaurant Login

The image shows a web page with two distinct login sections. The left section, titled 'User' in blue, contains a 'Username' field with the placeholder 'Enter Username', a 'Password' field with the placeholder 'Enter Password', a green 'Login' button, and a green 'Register' button. The right section, titled 'Restaurant' in blue, contains a 'Username' field with the text 'italian', a 'Password' field with a single dot, a green 'Login' button, and a green 'Add Restaurant' button. The entire page has a dark, textured background with a faint image of a person's face.

Section	Field	Value / Placeholder	Buttons
User	Username	Enter Username	Login, Register
	Password	Enter Password	
Restaurant	Username	italian	Login, Add Restaurant
	Password	.

Add Menu Item

A screenshot of a web form titled "Add Item to Menu" on a dark gray background. The form is centered and contains two input fields and one button. The first input field is labeled "Item Name" in blue text and contains the placeholder "Enter Item Name". The second input field is labeled "Item Price" in blue text and contains the placeholder "Enter Item Price". Below the input fields is a green button with the text "Add" in white. The form is set against a dark gray background with a subtle gradient.
